# Tacho2Safe

**Mobile downloader for driver card  
and digital tachograph**

**PC software with reports on activities and infringements included. No yearly license fee!**

Tacho2Safe is the successor of the successful TachoSafe. Thanks to its mobile nature the Tacho2Safe is suitable for all types of fleet managers.

Professional transport, private carriers, coach operators, but also for freelancers, agencies and so on. Thanks to the built-in card reader driver cards can be read in a minute.

The Tacho2Safe is (with the supplied cable) also used for downloading the memory of the tachograph itself. Due to the simple way of configuring what should be downloaded this process goes quickly and smoothly.

The TachoSafeLite 1.0 software is user-friendly and efficient. Multilingual!

The application keeps you informed of the observance of the download interval. Archive folders arranged by driver and vehicle. The reports are clear. Whether it is an overview of the activities of the driver or its compliance with driving regulations.

The price is very interesting. A total solution for the price of a downloadkey!
